

4-26-00

Dear Dr. Henry:

The dairy industry should not be allowed to maintain its monopoly on the use of the word "milk". I am writing to urge that the FDA allow non-dairy beverages to be labeled as "milk". Also, I urge that the agency require milk from cows to be labeled clearly as "cow milk".

Sincerely,

Elizabeth McEligott

Isn't man an amazing animal? He kills wildlife-birds, kangaroos, deer, all kinds of cats, coyotes, beavers, groundhogs, mice, foxes, and dingoes-by the million in order to protect his domestic animals and their feed. Then he kills domestic animals by the billion and eats them. This in turn kills man by the million, because eating all those animals leads to degenerative-and fatal-health conditions like heart disease, kidney disease, and cancer. So then man tortures and kills millions more animals to look for cures for these diseases. Elsewhere, millions of other human beings are being killed by hunger and malnutrition because food they could eat is being used to fatten domestic animals. Meanwhile, some people are dying of sad laughter at the absurdity of man, who kills so easily and so violently, and once a year sends out cards praying for "Peace on Earth."
